CONSTRUCTAL THERMODYNAMICS - Duke University

The constructal law was stated by Adrian Bejan, the J.A. Jones Distinguished Professor of Mechanical Engineering at Duke University, in 1996 as follows 1,2: "For a finite-size system to persist in time (to live), it must evolve in such a way that it provides easier access to the imposed currents that flow through it."

SOLUTION The term standard refers to an object or instrument, a method or a procedure that provides a value of an acceptable accuracy for comparison The constructal principle Abstract With Adrian Bejan's constructal theory, the perfect plan of the machines rests on a new scientific method, derived from the knowledge of diverse imperfections of the beings and the things from which are drawn and released the adequate drawings.

I met Adrian Bejan at the Lions Cannes Festival in June, where I was also introduced to his Constructal law. Here's a very nicely done video of Adrian explaining his theory. Here's the law in Bejan's terms: "For a finite-size system to persist in time (to live), it must evolve in such a way...

And now we know why, thanks to a study from Adrian Bejan, an engineering professor at Duke University. Bejan penned the theory of Constructal Law in 1996, which explored the changes in thermodynamics and how flow systems survived and evolved.

Adrian Bejan was awarded the 2018 Benjamin Franklin Medal for "Thermodynamics and constructal theory, which predicts natural design and its evolution in engineering, scientific, and social systems". He received all his degrees from the Massachusetts Institute of Technology (B.S.1971, M.S.1972, Ph.D.1975).

"A balance between individual and institutional approaches is the best idea, according to a new theory by a Duke University engineer Adrian Bejan, who thinks institutions benefit most from the co-existence of large groups that self-organize naturally and lone scientists coming up with brilliant new ideas.... big thinkers didn't disappear.

Constructal theory is a jolt the other way, a means to rationalize macroscopic features, objective, and behavior." There are many more examples, all from physics, which is the establishment that is now starting to catch up with (and claim) the physics of evolution, life and design that morphs with freedom.

In this week's eSkeptic, Chad Jones reviews Design in Nature: How the Constructal Law Governs Evolution in Biology, Physics, Technology, and Social Organization, by Dr. Adrian Bejan and J. Peder Zane (Doubleday, 2012, ISBN 9780385534611). The reviewer questions whether the authors' notion of "the constructal law" adds anything to Darwin's theory of evolution via natural selection.
