### Bing: Basic Principles Of Landscape Design

Balance in design is just as the word implies. Equality. There are basically two types of balance in landscape design. Symmetrical and Asymmetrical. Symmetrical balance is where there are more or less equally spaced matching elements of the garden design. With a garden equally divided, both sides could share the same shape, form, plant height, plant groupings, colors, bed shapes, theme, etc.

### Basic Principles of Landscape Design

Three principles of garden design apply to the overall "feel" of the landscape: namely, proportion, transition and unity. Landscape plants should be arranged so as to conform to these principles. Proportion is the sense that the size of the individual components (the landscape plants) or groups of components in a landscape is consistent with the landscape as a whole.

### Principles of landscape design - MSU Extension

Shape and Form - The contour and three-dimensional qualities of individual plants or groups of plants in the garden, as well as the outline of a garden room itself. Basic shapes stage the look of garden rooms. Shapes have symbolic meanings. Shapes convey "personality" that creates certain moods.
