In 1979, the Chinese government introduced a policy requiring couples from China's ethnic Han majority to limit themselves to one child. The official start of

implementation came in 1980, with an...

Despite The End Of China's One-Child Policy, Births Are ...

The one-child policy was a tool for China to not only address overpopulation, but to also address poverty alleviation and increase social mobility by consolidating the combined inherited wealth of the two previous generations into the investment and success of one child instead of having these resources spread thinly across multiple children.

See How the One-Child Policy Changed China

Today, China has the world's largest population at 1.4 billion people. However, back in 1979, Chinese leader Deng Xiaoping established the one-child policy in order to lessen the demand for resources like water and housing. As of 1965, the average household had six children.

one-child policy | Definition & Facts | Britannica

China's one child policy was a population planning policy that was introduced in 1979. It subjected about one-third of the country's population to having only one child. If the policy was violated, the fines could be imposed on families. The Chinese government claims that this policy prevented more than 400 million births.

One-child policy - Wikipedia

China's one-child policy was established by Chinese leader Deng Xiaoping in 1979 to restrict communist China's population growth and limited couples to having only one child. Although designated a "temporary measure," it remained in effect for more than 35 years.

Bing: China S One Child Policy

Overall, China's one-child policy may have worked too well and its reversal may have come too late, according to demographers and economists. Even if the birth rate jumped to 2 children per woman...
