Book Review: Climate Code Red- the Case for Emergency Action. Book review Climate Code Red - Climate Code Red, by David Spratt and Philip Sutton, Scribe Publications 2008. Spratt and Sutton have written an important book that looks at the current state of climate science, compares the projections for likely catastrophic and irreversible climate change to the policy measures and government reactions so far, and finds the latter seriously lacking.

climate code red - University of Utah

This is the story that Climate Code Red tells with conviction. It is a compelling case for recognising, as the UN secretary-general has said, that we face a climate emergency.' Dr James Hansen 'Perhaps the two most outstanding books on global warming to have been published lately are The Hot Topic.. and Climate Code Red.

Were I a philanthropist, I would purchase several hundred copies of both and send them to our politicians and policy-makers.'

Code red: Ottawa reaches highest level on pandemic scale ...

Climate Code Red: The Case for Emergency Action is a 2008 book which presents scientific evidence that the global warming crisis is worse than official reports and national governments have so far indicated. The book argues that we are facing a "sustainability emergency" that requires a clear break from business-as-usual politics. The authors explain that emergency action to address climate change is not so much a radical idea as an indispensable course we must embark upon. Climate Code Red draw

Climate Code Red eBook by David Spratt - 9781921753022 ...

"Climate Code Red applies an uncommon degree of common-sense to the latest climate science, and is a well-researched basis for building a truly meaningful response. It makes it abundantly clear that greenhouse-gas emissions have to stop entirely, and that even this must sit in a larger plan to manage our destabilised earth-atmosphere system."

Bing: Climate Code Red The Case

Climate Code Red shows that further temperature increases of 2 degrees are effectively already in the system, and even a temperature cap of 2-2.4°C, which is proposed within the United Nations framework - and is far below what most governments are prepared to aim for - would take the planet's climate beyond the temperature range of the last million years.

Climate Code Red : The Case for Emergency Action by ...

Climate Code Red is a significant contribution which should be read by anyone seriously contemplating how to set greenhouse emission-reduction targets.', "Having been involved with global warming climate change as a researcher in environmental health for 25 years, I can say that this is without question by far the best book to date on this issue—the first book to have the integrity to say how the situation really is."

Climate Code Red: the case for emergency action: Spratt ...

"Climate Code Red applies an uncommon degree of common-sense to the latest climate science, and is a well-researched basis for building a truly meaningful response. It makes it abundantly clear that greenhouse-gas emissions have to stop entirely, and that even this must sit in a larger plan to manage our destabilised earth-atmosphere system."
