## **Bing: Die Cutting And Tooling A**

Die-cutting tooling is a fundamental requirement of the carton and corrugated box manufacture process. Such tooling is made in 90% of cases by a third party specialist die-making organisation. As such it has a direct cost through normal procurement channels.

## **Tooling for Packaging Part One - The Cutting Die**

Die cutting is the general process of using a die to shear webs of low-strength materials, such as rubber, fibre, foil, cloth, paper, corrugated fibreboard, chipboard, paperboard, plastics, pressure-sensitive adhesive tapes, foam, and sheet metal. In the metalworking and leather industries, the process is known as clicking and the machine may be referred to as a clicking machine. When a dinking die or dinking machine is used, the process is known as dinking. Commonly produced items using this pr

## **Die Cutting Tools, Equipment, Die Making Manufacturers ...**

Die cutting is used in manufacturing a variety of items, like shoes and other items, by cutting components quickly and efficiently, with the perfect cut every time. In manufacturing processes like this, large industrial-strength die cutting machines are usually used to speed up the process and withstand the constant pressures of a heavy workload.
