heic1812 — Science Release. Hubble proves Einstein correct on galactic scales. 21 June 2018: An international team of astronomers using the NASA/ESA Hubble Space Telescope and the European Southern Observatory's Very Large Telescope

has made the most precise test of general relativity yet outside our Milky Way.

Press Releases 2018 | ESA/Hubble - Hubble Space Telescope

29 October 2018: The NASA/ESA Hubble Space Telescope doesn't usually get much assistance from its celestial subjects — but to take this image, the telescope opted for teamwork and made good use of a fascinating cosmic phenomenon known as gravitational lensing. This effect works when the gravitational influence of a massive object, such as the galaxy cluster in the centre of this image, is so colossal that it warps the surrounding space, causing nearby light to travel along distorted paths.

What Did Hubble See on Your Birthday? | NASA

Abell 370: this massive, distant cluster gravitationally lenses the background light, with Hubble revealing the distances to thousands of galaxies. On October 27, 2018, after three weeks in safe...
