Management of an obstetric emergency. Management of an obstetric emergency is the routine responsibility of everyone involved in maternity care, from junior doctors to specialist obstetricians, midwives and anaesthetists. All staff involved in care of birthing women should be educated in emergency management and, given the incidence of many obstetric emergencies, periodic training and drills should also be undertaken. 1.

### **A systematic review of training in acute obstetric emergencies**

In obstetrics there are two patients to care for instead of one, a mother and a baby or fetus. The management of one patient heavily affects the management of the other. Sometimes the decision has to be made to care for one patient at the expense of the other; i.e., care for the mother first. The second patient (the fetus) may be viable or not. Basic Emergency Care
