```
% --- Executes just before simple_gis made visible. function
simple_gui_OpeningFcn(hObject, eventdata, handles, varargin) % This function has
no output args, see OutputFcn. % hObject handle to figure % eventdata reserved -
to be defined in a future version of MATLAB % handles structure with handles and
user data (see GUIDATA) % varargin command line arguments to simple_g(see
VARARGIN) % Choose default command line output for simple_gui handles.output
= hObject; % Update handles structure ...
```

### **How to Create a GUI with GUIDE - Video - MATLAB**

GUIDE is the standard way of creating GUIs in MATLAB, but sometimes it is better to make the GUI programmatically. This often happens when you want to easily create and destroy buttons and other widgets during the course of the GUI's use. Handwritten code is often more compact and gives you more control over your GUI.

### **Matlab GUI - First steps...**

Start by running the command "guide" in Matlab. When you do so, the following pop-up window will appear: Select the default blank GUI option and click OK. You will now have the following workspace where you can drag and drop elements into your interface. Simply drag and drop items from the left 2 columns into the grid area to create your GUI!

### **Matlab Gui Guide**

Description The First segment of the course is on creating apps in MATLAB using its graphical user interface utility called GUIDE. The GUIDE provides essential graphical components for converting your code into a meaningful software. The

graphical components include radio buttons, tables, check boxes, sliders and many others.
