Microsoft Visio Tutorial For Beginners - 07/2020

Microsoft Visio - Overview. Computer diagramming is the process of creating scalable diagrams on a PC that can be used in various applications such as layout design, organization charts, timelines, floor plans and even prototype software user interfaces. Diagrams are made of shapes, objects and stencils, which when combined together correctly, can help project a lot of useful information.

Visio Tutorial: Creating a Basic Flowchart | Udemy Blog

Visio shapes are ready-made objects that you drag onto your drawing page — they are the building blocks of your diagram.. When you drag a shape from the Shapes window onto your drawing page, the original shape remains on the stencil. That original is called a master shape. The shape that you put on your drawing is a copy — also called an instance — of that master.
