safety as explained in this study guide. Licensed dentists should follow the FDA/ADA Guidelines for Prescribing Dental Radiographs.

Radiation Safety Training | Idaho State University

Radiation Safety Sample Questions 1. Radiation level of 560 Sv/Hr is measured at a distance of 16 feet from an Ir-192 source. How much additional distance has to be moved to get only 2 mR/Hr. $560 \text{ Sv} = 56 \text{ mR}$. $I_1 d_1^2 = I_2 d_2^2$. $D_2 = 56 \times 16 \times 16 = 7168$ Total distance at which radiation will be 2 mR = $d_2 = \sqrt{7168} = 85 \text{ ft}$. approx. So additional distance to be moved = $85 - 16 = 69 \text{ ft}$.
