swig. Swig is an awesome, Django/Jinja-like template engine for node.js.. seeking maintainers. Paul Armstrong has stepped down as the primary swig maintainer. Swig is a phenomenal project and a template engine that quietly, but strongly, stands tall against the others in a domain full of template engines.

Swig

Swig A Node.js and Browser-based JavaScript Template Engine. Documentation; Code; Filters. The rendering of variables can be modified by filters. Filters are special functions that are applied after any object token in a variable block using the pipe character, for example: `{{ names|join(', ') }}`.

Swig got its start in 2010 in Saint George, Utah. Owner and Founder Nicole Tanner was brainstorming with her husband one night about possible business ideas. He suggested a drive-by drink shop, something they both agreed could be successful. They opened their first location across the street from Dixie State University in April of 2010.

SWIG is most commonly used to create high-level interpreted or compiled programming environments, user interfaces, and as a tool for testing and prototyping C/C++ software. SWIG is typically used to parse C/C++ interfaces and generate the 'glue code' required for the above target languages to call into the C/C++ code.

SWIG Documentation, Presentations, and Papers

The second part of the SWIG documentation contains a chapter for each target level language. Each chapter will state the status (Supported or Experimental) for that language. 2.3.1 Supported status. A target language is given the 'Supported' status when. It is in a mature, well functioning state.
