## The Great Convergence Information Technology

The Great Convergence is an important text, because it argues for a change in the way we think about and deal with globalization. Baldwin disaggregates the monolithic, undifferentiated approach that considers globalization as a single phenomenon.

...

Baldwin argues in The Great Convergence that revolutionary advances in information and communications technology (ICT) transformed globalization around 1990 in ways that few governments and companies have yet to fully understand. Better communication allowed rich-nation firms to move manufacturing to developing nations.

### **THE GREAT CONVERGENCE: Information technology and the New ...**

In The Great Convergence, Richard Baldwin attempts to fathom the changes unfurling right now, what are the potential outcomes of those changes, and how to ensure they result in more good than bad. In order to provide some kind of perspective, he begins his work with some Big History, encompassing two hundred millennia of human development.

...

That was the Great Divergence. The new globalization is driven by information technology, which has radically reduced the cost of moving ideas across borders. This has made it practical for multinational firms to move labor-intensive work to developing nations.

### **The Great Convergence: Information Technology and the New**

...

Baldwin's book, *The Great Convergence*, elucidates how things are made in business today, how information and communication technology has radically changed production, and, lastly, what this now means for jobs. If you instinctively imagine this to be a jeremiad, as most books on globalization and jobs are, you're mostly correct.
